

ULTRA HARSH-ENVIRONMENT

GEO-MARINE®

HIGH-PRESSURE ENVIRONMENTAL AND HERMETIC CONNECTORS AND CABLES

MAY 2014

SERIES 22

GEO-MARINE®

Geo-Marine®

*Rugged marine bronze / stainless steel
harsh-environment connectors, cables,
and accessories*

Glenair Series 22 Geo-Marine® connectors, cables and accessories are designed for severe, high-pressure environment geophysical and oceanographic applications—from offshore oil drilling to seabed exploration and pipeline inspection systems. Preferred by the U.S. Navy and oil patch equipment manufacturers for decades, this third-generation product features: Marine-grade stainless steel machined shells and naval bronze plug coupling rings • High-pressure environmental and hermetic options • Power and signal insert arrangements from 2 to 128 contacts • Anti-decoupling devices on all plugs • Locksmith-keyed polarization • A full line of backshells, protective covers, and molding adapters. Glenair stocks all popular Series 22 Geo-Marine® components for immediate, same-day shipping, and can design and fabricate Geo-Marine® overmolded cable assemblies for the ultimate in high-pressure, extreme environment interconnect protection.

SERIES 22

Geo-Marine®

High-pressure harsh-environment connectors and overmolded cables

Applications

Designed for use in oceanographic, geophysical and other severe industrial environments, Glenair Series 22 Geo-Marine® Connectors and Cables are the ultimate harsh-environment power and signal connector solution. Built to withstand hydrostatic pressures up to 5,000 PSI and exposure to extreme temperatures and corrosives, the Series 22 Geo-Marine® is ideally suited for applications such as US Navy towed array sonar systems, military land vehicles, submersibles and ROV's, offshore-oil drilling equipment, seabed exploration, pipeline inspection systems, well monitoring equipment, and digital seismic streamers.

Design

Geo-Marine® plugs are equipped with arctic coupling nuts—made from marine-grade naval bronze—with easy-to-grip castellated knurling and a powerful ratcheted anti-decoupling mechanism which guarantees reliable mating and demating performance in even the harshest environments. Supplied as discrete connectors—or more typically in build-to-print overmolded cable assemblies—the Series 22 Geo-Marine® has delivered reliable, proven performance for over four decades and represents the ultimate interconnect solution for high-pressure, harsh-environment applications.

- Marine Grade 316 stainless steel machined shells and Naval Bronze coupling rings
- High-pressure environmental and hermetically sealed receptacles for field applications
- Power and signal contact arrangements from 2 to 128 contacts
- Anti-vibration ratcheted coupling nuts with castellated knurling
- Available Viton® overmolded cable assemblies

High-pressure environmental and hermetic connectors

Anti-Galling Arctic Coupling Nuts

One of the most valuable features of the Series 22 Geo-Marine® from the user's perspective is the specially-designed castellated and knurled coupling nut which facilitates rapid mating and demating in field applications. Single-start, stub Acme threads reduce thread fouling and binding, and are supplied with an anti-vibration/anti-decoupling device which prevents accidental loosening or decoupling. Plugs contribute to high-pressure sealing, up to 5,000 PSI in the mated condition, by means of rugged and durable interfacial and peripheral seals.

Range of Offerings

Series 22 Geo-Marine® connectors are supplied with either fused-glass ("H" hermetic class) or high grade thermoplastic ("E" environmental class) insulators. Both classes of connectors are supplied with rugged, corrosion-resistant materials. Low-profile and scoop-proof cable plugs and receptacles, as well as bulkhead feed-throughs are available. Specially-designed cable sealing backshells as well as EMI/RFI shield termination backshells and environmentally-sealed protective covers complete the range of discrete product offerings. 35 insert arrangements (contact sizes #12, #16, #20 and #22) are tooled and fully available.

Receptacle Configurations: High-pressure environmental ("E") and hermetic ("H") class receptacles are available for cable as well as box applications. Rugged o-ring piston seals located inside the receptacle barrel contribute to reliable high-pressure sealing in the mated condition. Glenair is able to supply Geo-Marine® customers with a wide range of receptacle configurations for unique requirements including low-profile and scoop-proof designs, pin and socket contact designs, solder cup and printed circuit board termination, unique flange shapes and mounting configurations, in-line cable receptacles, connector savers and gender changers.

Catalog Notes

For all parts in this catalog:

- All parts will be identified with manufacturer's name and part number, space permitting.
- Glenair 600 series backshell assembly tools are recommended for assembly and installation.
- Electrical ratings are based on connectors only, not terminated to a cable or conductors, with proper cleaning and drying after hydrostatic testing.
- On all length callouts, tolerance is $\pm .060$ unless otherwise specified.
- Metric dimensions appear in parentheses in diagrams and tables, based on 1 inch = 25.4 mm, for reference only. Unless otherwise specified, the following other dimensional tolerances apply:

.xx = $\pm .03$ (0.8)
 .xxx = $\pm .015$ (0.4)
 Lengths = $\pm .060$ (1.52)
 Angles = $\pm 5^\circ$

Caution

Electrical safety limits must be established by the user. Peak voltages, switching surges, transients, etc., should be used to determine the safety of application.

Custom Contact Insert Arrangements

Series 22 inserts may be tooled for alternative contact insert arrangements including variably sized electrical contacts—from size 12 to 22—as well as hybrid arrangements incorporating fiber optic, Coax and other contact types. Glenair has produced hundreds of custom arrangements beyond those shown in this catalog. Please contact your local Glenair representative, or the factory, for assistance.

SERIES 22

GEO-MARINE[®] CONNECTORS

*Standard · scoop-proof · high-
pressure environmental · hermetic*

Designed for use in geophysical and other harsh marine and oil-patch applications, Series 22 Geo-Marine[®] connectors feature specially designed castellated and knurled coupling nuts for quick connect and disconnect. Single-start, stub Acme threads reduce thread fouling and binding, and an integrated anti-vibration/anti-decoupling mechanism prevents accidental loosening or decoupling. Interfacial, peripheral and piston o-ring seals provide environmental sealing to 5,000 PSI in mated condition. Standard cable plugs (shown below) as well as special-purpose configurations including flange-mount, cable grip, and lanyard quick-disconnect are available.

Series 22
Geo-Marine® Connectors

Quick Selection Guide

High-Pressure Environmental/Hermetic Jam Nut Bulkhead Receptacle, Front Mount
220-00 (Standard) and 220-10 (Scoop-Proof)

B-2

High-Pressure Environmental/Hermetic In-Line Receptacle Connector
220-01 (Standard) and 220-11 (Scoop-Proof)

B-4

High-Pressure Environmental/Hermetic Square Flange Mount Receptacle Connector
220-02 (Standard) and 220-12 (Scoop-Proof)

B-6

Hermetic Solder-Mount Bulkhead Receptacle Connector, Front Mount
220-03 (Standard) 220-13 (Scoop-Proof)

B-8

High-Pressure Environmental/Hermetic Jam Nut Receptacle with Accessory Threads, Rear Mount
220-04 (Standard) and 220-14 (Scoop-Proof)

B-10

High-Pressure Environmental Cable Plug
220-06 (Standard) and 220-16 (Scoop-Proof)

B-12

High-Pressure Environmental/Hermetic Jam Nut Receptacle, Rear Box Mount
220-07 (Standard) and 220-17 (Scoop-Proof)

B-14

High-Pressure Environmental Box-Mount Plug
220-09 (Standard) and 220-19 (Scoop-Proof)

B-16

High-Pressure Environmental/Hermetic Jam Nut Mount Bulkhead Feed-Through
227-039 (Standard) and 227-040 (Scoop-Proof)

B-18

220-00 and 220-10 High-Pressure Environmental/Hermetic Jam Nut Bulkhead Receptacle, Front Mount

SERIES 22 RECEPTACLE IN STANDARD OR SCOOP-PROOF SHELL WITH PIN OR SOCKET CONTACTS

How To Order					
Sample Part Number	220-00	H	24-61	P	N
Series and Shell Style	220-00 - Standard 220-10 - Scoop-Proof (Not Shown)				
Class	H = Hermetic E = Environmental				
Shell Size - Insert Arrangement	See page A-6				
Contact Style	P = Pins S = Sockets C = Pin PC Termination D = Socket PC Termination				
Polarization	N, 1, 2, 3, 4 See page A-6				

Prior to use, lubricate O-rings with high grade silicone lubricant (Moly-kote M55 or equivalent).

B

Metric dimensions (mm) are indicated in parentheses

220-00 and 220-10 High-Pressure Environmental/Hermetic Jam Nut Bulkhead Receptacle, Front Mount

Notes

1. Power to a given contact on one end will result in power to contact directly opposite, regardless of identification letter.
2. For standard o-ring option, $\sqrt[3]{}$ does not apply and E dia s/b +.010
-.000
3. For pin/pin and skt/skt, symmetrical layouts only, consult factory for available insert arrangements.

SERIES 22

BACKSHELLS AND ACCESSORIES

*Complete harsh-environment
interconnect system protection*

The Glenair Series 22 Geo-Marine® full-spectrum product line includes a range of fixed or variable entry molding adapters, straight and 90° strain-relief backsells, and metal or composite covers for protection and sealing of Geo-Marine® plugs and receptacles. Glenair can also design and fabricate wired and overmolded Geo-Marine® cable assemblies for the ultimate harsh-environment sealing protection. Glenair Geo-Marine® accessories and backsells are in stock and available for immediate shipment. Contact the factory for further details to meet specific application needs.

Glenair, Inc.

www.glenair.com

Accessories for front and back-end protection—plus turnkey overmolded cordsets

Cable sealing backshells, strain-reliefs and protective covers extend the life of Geo-Marine® interconnect systems

Glenair Geo-Marine® connector accessories are ideally suited for use in harsh environments where resistance to high temperatures, outgassing, corrosive fluids, fire, shock and vibration is required. Corrosive resistant stainless steel connector accessories (SAE-AMS-QQ-S-763 AISI 300 Series) are passivated to ASTM A967. Harsh-environment overmolded cables are available in point-to-point or complex multibranch configurations, or pigtailed terminated with non-hydroscopic potting compound.

Product Features

- Protective covers effectively seal unmated connectors up to 5000 psi and provide robust mechanical protection to connector contacts and threads
- Turnkey overmolded cordsets for complete high-pressure, harsh-environment interconnect protection
- Passivated stainless steel, aluminum, and composite thermoplastic accessories available
- Environmental and strain-relief backshells in straight and 90° versions

Quick Selection Guide

Part No.	Description	Page
290-011	Fixed SST molding adapter	C-2
290-012	Variable entry SST molding adapter	C-2
290-003	Straight or 90° Strain-relief backshell	C-4
290-004	Straight or 90° Environmental Strain Relief backshell	C-4
297W-003	EMI/RFI Strain Relief Backshell	C-6
290-009	Metal shell protective plug cover	C-8
290-010	Metal shell protective receptacle cover	C-9
290-016	Metal shell protective scoop-proof plug cover	C-10
667-011	Composite shell protective plug cover	C-14
667-012	Composite shell protective receptacle cover	C-14

STAINLESS STEEL MOLDING ADAPTERS, STANDARD OR WITH OPTIONAL CABLE ENTRY DIAMETERS

How To Order		
Sample Part Number	290WS011	-18
Basic Number	290WS011	
Shell Size	See Table I	

Tips

To select the appropriate molding adapter, consider the following basic suggestions to ensure a high integrity, quality molded termination:

- Select a molding adapter which will provide adequate inside working room to accept the termination envelope, especially if there are shield terminations, splices, etc.
- If the termination is to be molded with neoprene or other material using a transfer molding process, select the molding adapter cable entry diameter close to the outside diameter of the cable or termination envelope.

How To Order		
Sample Part Number	290WS012	-18 12
Basic Number	290WS012	
Shell Size	See Table II	
Cable Entry Size	See Table II	

Notes

1. Prior to use, lubricate O-rings with high grade silicone lubricant (Molykote M55 or equivalent).
2. Material:
Adapter - stainless steel.
O-ring - nitrile

Instructions for using cable molding adapters

1. Slide 290WS011/012 adapter over cable
2. Prepare cable and wires
3. If using shrink sleeves, slide them over wire insulation and solder terminated wires to solder cup contacts; slide shrink sleeves to correct position and apply recommended heat.
4. Slide 290WS011/012 adapter and attach hand-tight to plug connector.
5. Use Plug Holding Tool (P/N 600-005) along with Hand Held Torque Wrench (P/N 600-076) and Spanner Wrench (P/N 600-171) to tighten to recommended torque value.

Please note that the "tightening/staking indentations" are on the 290WS011/012 Adapter, NOT on the Marine Bronze Coupling Nut. The "holes" in the coupling nut retain the spring for the anti-decoupling feature of the cable plug.

The TG70 Strap Wrench and the 600-076 Torque Wrench should be utilized to properly torque the cable/plug assembly to the appropriate receptacle

290-003 and 290-004 Strain-Relief Clamps and Environmental Backshells

90°, 45° OR STRAIGHT ENVIRONMENTAL BACKSHELL AND/OR CABLE CLAMP

M	Electroless Nickel
N	Cadmium Plate/Olive Drab Over Nickel Plate
GB	Hard Coat, Mil-A-8625 Color Black
NF	Cad/O. D. Over Electroless Nickel (1000 Hour Salt Spray)
Z1	Stainless Steel Material Passivate Per QQ-P-35

Notes

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Standard minimum length for Style I is 1.50 Inch, for Style II is 2.00 Inches. For shorter length, consult factory. Note: applies to Sym S, straight, only.
3. When cable diameter exceeds inside diameter or connector shell, Style II will be supplied.
4. Glenair 600 series backshell assembly tools are recommended for assembly and installation.
5. Material/finish:
Elbows, adapter, coupling & gland nuts, clamp - Al alloy or CRES/see Table II.
Grip, hardware - CRES/passivate.

Notes

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Standard minimum length for Style I is 1.50 Inch, for Style II is 2.00 Inches. For shorter length, consult factory. Note: applies to Sym S, straight, only.
3. When maximum cable range exceeds inside diameter of connector shell:
 Sym S: Style II will be supplied.
 Sym H and Sym J: dimension C, D, E & F does not apply.
4. Glenair 600 series backshell assembly tools are recommended for assembly and installation.
5. Material/Finish:
 - Elbow, adapter, clamp, hardware, spring follower, coupling and gland nuts - CRES/pasivate
 - Washer - Fluoropolymer/n.a.
 - Grommet, o-rings - silicone/n.a.

290-009 Metal Plug Protective Covers for Standard (Non-Scoop-Proof) Series 22 Connectors

How To Order Plug Cover					
Sample Part Number	290-009	S	18	03-	5
Series - Shell Style	290-009 = Standard Plug				
Attachment Type	See Table III				
Shell Size	See Table I				
Dash No.	See Table II or Table IV				
Attachment Length	5 = 5 inches				

Notes:

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Protective cover is capable of hydrostatic sealing pressures to 5000 PSI, when fully mated with counterpart plug.
3. Material/finish:
Cover, hardware & split ring - 300 series stainless steel/passivate
Wire rope - CRES, see Table III/passivate
O-ring - nitrile/n.a.

290-010 Metal Receptacle Protective Covers for Standard (Non-Scoop-Proof) Series 22 Connectors

How To Order Receptacle Cover					
Sample Part Number	290-010	S	18	03	-6
Series - Shell Style	290-010 = Scoop Proof				
Attachment Type	See Table III				
Shell Size	See Table I				
Dash No.	See Table II or Table IV				
Attachment Length	5 = 5 inches				

Notes:

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Length tolerance for link chain (e) and sash chain (s) is ± one (1) link, for all other attachments ±.25.
3. Protective cover is capable of hydrostatic sealing pressures to 5000 PSI, when fully mated with counterpart plug.
4. Material/finish:
Cover, hardware & split ring - 300 series stainless steel/passivate
Attachment - see Table III/passivate
O-ring - nitrile/n.a.

All Series 22 connectors can be supplied complete with molded cable terminations or open wire bundles to meet specific application requirements. **Custom Overmolded Cable Assemblies**, built in our tightly controlled, 100% inspection and test facilities, are a turnkey solution to the complex requirements of harsh environment interconnect systems.

Glenair offers users of Series 22 Geo-Marine® connectors a complete custom cabling service, designing and producing cable assemblies or harnesses to meet the user's specific application requirements.

Glenair has over 30 years experience and expertise in designing and producing cable assemblies to meet many unique environmental conditions, supported by test facilities to provide the user with proven reliability and performance.

CABLE PLUG WITH MOLDED CABLE

Molded connector-to-cable terminations are the common application for Series 22 connectors, with materials and compounds available to satisfy the most stringent application. Typical molding and cable jacketing materials include:

- Neoprene
- Polyurethane
- Viton

Conductor insulation on wire is selected for compatibility with the molding and jacket materials for optimum performance and cost-effectiveness.

Additional custom features include items such as EMI shielding, Kevlar stress members, multiple breakouts, as well as open wire bundles or "pigtailed" which are terminated with a non-hydroscopic potting compound.

Special molded shapes are available to accommodate unusual space limitations or cable routing.

Contact Glenair's ABC Division for further information on complete cable assemblies using the Series 22 Geo-Marine® connectors.

CABLE RECEPTACLE WITH MOLDED CABLE

BULKHEAD RECEPTACLE WITH PIGTAILS

Depicted here is a typical cable assembly designed to withstand pressure to 5000 PSI. Glenair's standard molding material is solvent and oil resistant neoprene per MIL-S-6855 molded to neoprene jacketed cable containing either rubber or fluoropolymer insulated, fine stranded, copper conductors. Special molded shapes and cable configurations are available per customer requirements.

SERIES 22

UNIQUE APPLICATION CONNECTORS

Geo-Marine®

Special flange designs and custom configurations

Glenair has provided solutions to the toughest environmental interconnect challenges for decades. Put Glenair's experience to work for you—our engineers are ready to design high-pressure, harsh-environment interconnect components to fit even the most challenging and unusual applications. From space-saving special flange designs to unique coupling-nut configurations, these pages demonstrate some of Glenair's design capabilities.

Notes:

1. Assembly identified with manufactures name and P/N, space permitting.
2. 227-015 Connector is designed to mate with Glenair 220 series connector receptacles.
3. For available insert arrangement, see Glenair Geo-Marine® catalog or consult factory.
4. Performance capabilities:
 - Current rating: see Glenair Geo-Marine® catalog.
5. For cable or wire assemblies, consult factory.
6. Material/finish:
 - Coupling nut, adapter, barrel, lanyard ferrule, bushing, ring, coil spring, lanyard - stainless/passivate.
 - Contacts - copper alloy/gold plate
 - Inner sleeve - nickel aluminum bronze/degreased
 - Insulator - high grade rigid dielectric/N.A.
 - Retaining springs - phos. bronze/n.a.
 - Thimble - per NAS AN100C3
 - Hook - per NAS 1281C7
 - O-ring - nitrile/N.A.
 - Flat seal - fluorosilicone/N.A.
7. Snap hook will accept a diameter of .19 and is included in the open position

227-158 High-Pressure Environmental Cable Plug with Wire Mesh Cable Grip

How To Order							
Sample Part Number	227-158	24	-61	S	N	-CG	12
Basic No.	227-158						
Shell Size	See Table II						
Insert Arrangement Dash No.	See Table I						
Contact Style	P = Pin, S = Socket						
Alternate Key Position	N, 1, 2, 3 or 4						
Cable Grip Designator	Supplied with wire mesh cable grip. Omit for None						
Cable Entry Dash Number	03, 04, 06, 08, 10, 12, 14, 16	See Table III					

Notes:

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Performance capabilities:
 - Current rating:
 - Size 12 contact - Environmental: 23 amps
 - Size 16 contact - Environmental: 13 amps
 - Size 20 contact - Environmental: 7.5 amps
 - Size 22 contact - Environmental: 5 amps
 - Hydrostatic pressure rating: 5000 PSI, fully mated.
 - Insulation resistance: 1000 megaohms min at 500 VDC

Note: electrical safety limits to be set by user. Peak voltages, switching surges, transients, etc., should be used to determine safe applications.

3. Material/finish:
 - Barrel - 316L stainless steel/passivate
 - Contacts - copper alloy/gold plate
 - Coupling nut - nickel-aluminum-bronze/degrease
 - Hardware - 300 series stainless steel/passivate
 - Insulator - high grade rigid dielectric/n.a.
 - Seals - fluorosilicone

Table III: Material and Finish

SYM	Finish Description
B	Cadmium plate/olive drab
J	Gold iridite over cadmium plate over nickel
M	Electroless nickel
N	Cadmium plate/olive drab over nickel
NF	CAD/O. D. over electroless nickel (500 hour salt spray)
T	Cadmium plate/bright dip over nickel
Z1	Stainless steel, passivated

940-014 High-Pressure Environmental Sav-Con® Connector Saver (Non Scoop-Proof)

How To Order							
Sample Part Number	940	-014	M	24	-61	S	N
Series No.	940						
Basic No.	014						
Finish Symbol	B, J, M, N, NF, T, Z1 See Table II						
Shell Size	10, 12, 14, 16, 18, 20, 22, 24 See Table III						
Insert Arrangement	See Table I						
Contact Style	P = Pins, Plug Side S = Sockets, Plug Side						
Alternate Key Position	N, 1, 2, 3 or 4						

Notes

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Glenair 940-014 connector saver is designed to mate with Glenair 220-06 series Geo-Marine® connectors. (Non-scoop-proof)
3. Material/finish:
Barrel, shell, coupling nuts - see Table II.
Contacts - copper alloy/gold plate.
Insulators - high grade rigid dielectric/N.A.
O-ring & seals - silicone/N.A.

other end - any
geomarine non
scoop proof recpt

D

227-162H Hermetic Receptacle with Triangular Flange Mount

RECEPTACLE CONNECTOR WITH SPECIAL TRIANGULAR FLANGE

How To Order					
Sample Part Number	227-162H	24	-100	P	N
Series - Shell Style	227-162H				
Shell size	24				
Insert Arrangement Dash No.	-100				
Contact Style	P = Pin				
Polarization	N, 1, 2, 3 or 4				

Notes

1. Clearance for 1 inch hex socket wrench.
2. Prepot with epoxy.
3. Mates with glenair 227-166 plug connector.
4. Dimensions per V0GEE0017A, Rev. B.
5. Assembly to be identified with manufacturer's name, part number and date code.
6. Performance capabilities:
Current rating:
 - 4 power contacts - 2.0 Amps @ 660 vac, continuous
 - 96 Signal contacts- 1.5 Amps @ 200VDC max., continuous DWV and IR:
 - DWV- 1500 vac between pin to pin and pins to shell.
 - Insulation resistance- 100 megohms min @ 1000/250VDC pin to pin and pins to shell
 Pressure and hermeticity:

- Hydrostatic pressure rating: - 5800 PSI, open face, in both directions.
 - hermeticity - 1×10^{-6} ccHe/sec @ 1 atm. diff.
- NOTE: electrical safety limits to be set by user. Peak voltages, switching surges, transients, etc. Should be used to determine safe application of product. Glenair is not liable if the voltage and current exceed the limit set forth.

7. Material/finish:
 - Shell- 316L/passivate
 - Contacts- 52 ni alloy/gold plated
 - Insulator- full glass with epoxy backfill/n.a.
 - Interfacial and o-ring seals- nitrile/n.a.

NOTE: unless otherwise stated

Notes

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Performance capabilities:
 - Current rating: size 16 contact - 750 VDC, 10 amps size 20 contact - 500 VDC, 5 amp size 22 contact - 500 VDC, 3 amp
 - Hydrostatic pressure rating: 5000 PSI, fully mated
 - Insulation resistance: 1000 megaohms @ 500 VDC

Note: electrical safety limits to be set by user peak voltages switching surges, transients, etc. should be used to determine safe applications. Position from keyway will vary.

3. Material/finish:

- Barrel - 316 stainless steel/passivate
- Hardware - 300 series stainless steel/passivate coupling nut - nickel-aluminum-bronze/degrease
- Contacts - copper alloy/gold plate
- Insulator - high grade rigid dielectric/na o-rings - nitrile/na

SERIES 10KPSI

Underwater Interconnect Assemblies

Glenair 10 KPSI Underwater Interconnects provide a cost-effective solution for high pressure underwater applications. Ideal for any harsh environment application, these molded neoprene cables and epoxy bulkhead connectors are impervious to most chemicals.

- 7.5 Amps to 200 Amps
- Two to Eight Contacts
- 10,000 PSI (Mated) Pressure Rating
- Catalog and Custom Cable Options
- Chemically Resistant

SERIES 10KPSI Underwater Interconnect Assemblies

How-to-order

MALE CABLE ASSEMBLIES

Number of Contacts	Contact Quantity/Size	Cable Length*	Part Number	A Dia	B	C
2	1 #10, 1#12	2 feet	GL20G2P-M	.75 (19.1)	2.65 (67.3)	2.00 (50.8)
3	1 #10, 2 #12	2 feet	GL20G3P-M	.75 (19.1)	2.65 (67.3)	2.00 (50.8)
4	1 #12, 3 #16	2 feet	GL20G4P-M	.75 (19.1)	2.65 (67.3)	2.00 (50.8)
	1 #10, 3 #12	2 feet	GL20K4P-M	1.06 (26.9)	3.25 (82.6)	2.62 (66.5)
5	1 #10, 4 #16	2 feet	GL20K5P-M	1.06 (26.9)	3.25 (82.6)	2.62 (66.5)
6	1 #12, 5 #16	2 feet	GL20K6P-M	1.06 (26.9)	3.25 (82.6)	2.62 (66.5)
8	1 #12, 7 #16	2 feet	GL20K8P-M	1.06 (26.9)	3.25 (82.6)	2.62 (66.5)

*For other lengths, add overall length in feet to the part number.
Example: [GL20G1P-M-6](#) specifies a cable assembly 6 feet in length

FEMALE CABLE ASSEMBLIES

Number of Contacts	Contact Quantity/Size	Cable Length*	Part Number	A Dia	B
2	1 #10, 1#12	2 feet	GL20G2S-F	.75 (19.1)	2.65 (67.3)
3	1 #10, 2 #12	2 feet	GL20G3S-F	.75 (19.1)	2.65 (67.3)
4	1 #12, 3 #16	2 feet	GL20G4S-F	.75 (19.1)	2.65 (67.3)
	1 #10, 3 #12	2 feet	GL20K4S-F	1.06 (26.9)	3.50 (88.9)
5	1 #10, 4 #16	2 feet	GL20K5S-F	1.06 (26.9)	3.50 (88.9)
6	1 #12, 5 #16	2 feet	GL20K6S-F	1.06 (26.9)	3.50 (88.9)
8	1 #12, 7 #16	2 feet	GL20K8S-F	1.06 (26.9)	3.50 (88.9)

*For other lengths, add overall length in feet to the part number.
Example: [GL20G1S-F-6](#) specifies a cable assembly 6 feet in length

MALE BULKHEAD CONNECTORS

Specifications, contact arrangements and accessories

Male Bulkhead Connector

Specifications	
Contacts	Copper Alloy, Gold-Plated
O-Rings	Nitrile
Nut, Washer	Stainless Steel
Cable	Neoprene insulation, Stranded Copper Conductor
Bulkhead Connector Body	Glass-Filled Epoxy
Voltage Rating	600 VDC
Current Rating	See Contact Arrangements
Temperature Rating	-55°C to +105°C

ACCESSORIES

Locking Sleeves

Locking Sleeves enable a mated pair of cable assemblies to be locked together, preventing accidental unmating. Material: Delrin.

Cable Part No.	Type	Sleeve Part No.
GL20G*P	Male	GL20G401
GL20K*P	Male	GL20K403
GL20G*S	Female	GL20G402
GL20K*S	Female	GL20K404

O-Rings

Replacement O-Rings for bulkhead connectors. Material: Nitrile

Cable Part No.	O-Ring
GL30G	2-213
GL30K	2-217

QUALIFIED

MIL-DTL-28840 Connectors and Accessories

MIL-DTL-28840 qualified connectors in-stock and ready for immediate, same-day shipment

- High Density, Scoop Proof Contact Arrangements
- Flange Mount, Box Mount, Jam-Nut and In-Line Receptacles
- Straight, 45° and 90° Strain Reliefs and Backshell Assemblies
- Sav-Con® Connector Savers
- MIL-DTL-28840 Qualified
- Additional Glenair Commercial Part Numbers with Features Not Available in the Mil-Spec

Qualified military standard electrical connectors and accessories for shipboard—and all rugged environmental applications

Performance Specifications	
Current Rating (Maximum)	Size #20 Contact; 20AWG 7.5A, 22AWG 5.0A, 28AWG 1.5A, 30AWG 1.0A
Test Voltage (DWV)	1000 VAC RMS at sea level. Test per EIA-364-20
Insulation Resistance	5000 megohms minimum (at ambient temperature) per EIA-364-21
Contact Resistance	Per SAE-AS39029
Operating Temperature	-55° C. to +200° C.
Immersion	per test method EIA-364-09
Shock	in accordance with MIL-S-901 grade A
Vibration	per EIA-364-28 test procedure
Magnetic Permeability	2.0 μ (Aluminum), 5.0 μ (Stainless Steel) maximum; ASTM-A342/A342M

Splined MIL-DTL-28840 connector-to-backshell interface is ideally suited for heavy backshells and cables

MARINE BRONZE Seacrow Connectors

for harsh-environment applications

Glenair manufactures connectors qualified to V96929, VG95234 and VG95328 standards. These connectors are mostly used in harsh-environment military applications for ground vehicles and ground systems. Our new Marine Bronze version increases the level of robustness of these connectors to be successfully used in all severe environment navy installations, as well as off-shore platforms, sea ports, geological and oceanographic applications.

- **Marine bronze alloy for superior corrosion resistance in seawater and other harsh environments**
- **Ideal for shipboard and offshore drilling applications**
- **Available in Series ITS, Series IPT, Series IGE and Series IT**
- **IP67 standard environmental sealing, IP68 available**

Harsh-environment shipboard application

ITS-MB REVERSE-BAYONET CONNECTORS

VG95234 Compliant Marine Bronze Series

ITS-MB connectors are compliant with VG95234, using all the same insert arrangements available in the standard ITS Reverse Bayonet Connectors catalogue. Typically they are used for power and signal transmission, with wires from 32 AWG to 4/0. A wide variety of backshells allow the ITS-MB to accept jacketed cables, single or multi-poles, with or without RFI/EMI shielding, conduits with PG or metric thread. IP67 protection is the standard performance. IP68 on request.

IPT-MB MIL-C-26482 HIGH DENSITY CONNECTORS

VG95328 Compliant Marine Bronze Series

IPT-MB connectors are the choice for reliability when 20-16 AWG signal cables are used. The insert arrangements as well as the electrical characteristics are detailed in the IPT IPT-SE Catalogue. Backshells suitable for EMI shield terminations and heat shrink boots are also available.

The receptacle is also available with PCB contacts. IP67 protection is the standard performance. IP68 on request.

IGE-MB REVERSE-BAYONET SINGLE-POLE CONNECTORS

VG96929 Compliant Marine Bronze Series

IGE-MB High Power Single Pole Connectors are used with cables from 16 to 240 mmq. These connectors achieve high-performance working current and peak current, and are ideal for engines, power supplies, and power distribution boxes. Several backshells are available, either straight or 90° elbows for the most reliable cable accommodation. See the VG96929 Catalogue for detailed electrical characteristics. IP67 protection is the standard performance. IP68 on request.

IT-MB MIL-C-5015G THREADED CONNECTORS

VG95234 Compliant Marine Bronze Series

IT-MB is a threaded connector compliant with the MIL-DTL-5015 standard. All the electrical characteristics are available in the IT standard catalogue. IT-MB family is a threaded version mostly used for power and signal, frequently utilized with high-performance IP68 sealing. IP67 is considered standard performance.

RADGRIP™ COUPLING NUTS

For fast, easy mating of ITS Series bayonet connectors plus improved coupling nut mechanical protection

Better grip, improved durability

Glenair ITS-RG Series connector plugs with RadGrip™ rubber coupling nut covers was developed for harsh environmental field applications. RadGrip™ covers feature wide, easy-to-grip castellations as well as a raised thumb tab. Built for maximum durability and mechanical protection of plug coupling nuts, RadGrip™ is the perfect solution for advanced protection against shock and other forms of mechanical damage. In addition, RadGrip™ facilitates rapid mating and demating of connectors, even when surfaces are contaminated with oil, dust, water and other fluids. The highly durable rubber compound may be specified in seven different colors for improved connector and cable identification.

Colors available: Black, Yellow, Red, Blue, Light Green, Orange and Grey.

RadGrip™ material specifications

IAW UNI-CEI 11170 - AFNOR NF-F 16101 - BSS 7239 - ASTM E - 162, ASTM E-662
RadGrip™ covers adhere easily to Aluminum alloy, Stainless steel and Marine bronze.

- Fast, easy 1/4 turn bayonet coupling
- Ergonomically designed for use with arctic gloves
- High Shock and Vibration Resistant
- Compatible with all Series ITS 5015 type connector shell sizes
- Durable chemical-resistant material
- Colored materials facilitate connector and cable identification and/or connector phases

SERIES ITS-RG

RadGrip™ Easy-Mate Rubber Covered Coupling Nut Connectors

Straight and 90° Plugs

90° right-angle plug with RGG cable gland

Straight plug with optional strain relief clamp. Consult factory for additional backshell options in the ITS-RG series

How To Order										
Sample Part Number	ITS	G	31	06	RRG	20-27	P	Y	BK	
Product Series	Reverse-Bayonet Coupling Connector									
Grounding Fingers	G = Grounding Fingers Omit for Standard									
Contact Type	31 = Solder 41 = Crimp									
Shell Style	06 = Straight Plug with Accessory Threads 08 = Plug with 90° Backshell									
Connector/Backshell Class	RRG = Plug, environmental with rubber-covered coupling nut and cable gland RRG = Plug, environmental with rubber-covered coupling nut and rubber-covered EMI/RFI cable sealing backshell									
Shell Size/Insert Arrangement	See Catalog									
Contact Gender	P = Pin S = Socket									
Alternate Insert Rotation	Omit for Normal									
Color Code	BK = Black RD = Red YL = Yellow BL = Blue OR = Orange LG = Light Green GY = Grey									

ITS-RGG (06) Straight Plug

ITS-RRG (06) Straight Plug with EMI/RFI Cable Sealing Backshell

ITS-RGG (08) 90° Right-Angle Plug

ITS-RRG (08) 90° Right-Angle Plug with EMI/RFI Cable Sealing Backshell

Why Choose **GLENAIR?**

Plenty of Raw Materials!

Outstanding
Customer Service!

Abundant Machining Capacity!

In-House Assembly!

Huge "Same-Day" Inventory!

One of North America's
and Machining

High-Production Injection Molding Equipment

State-of-the-Art Plating Capabilities

The Industry's Most Experienced EMI/RFI Braided Shielding Specialists

Largest CNC Milling Installations

Clean Rooms for Filter Array and Printed Circuit Board Assembly

Out of This World
