## Connector Savers

*The smart solution for preventing contact damage and extending service life*

**G**lenair Sav-Con<sup>®</sup> connector savers are the smart solution for preventing contact damage and extending the service life of cable assemblies. Sav-Con<sup>®</sup> connector savers protect connectors that are mated and unmated frequently during manufacturing, test, check-out phases, and environmental test programs. They prevent costly repair or replacement by absorbing connect and disconnect abuse. Glenair Sav-Con<sup>®</sup> connector savers are available for all MS circular connector types, as well as for Glenair Mighty Mouse connectors, D-Subminiature and Micro-D connectors.

## Connector Savers

The smart solution for preventing contact damage and extending the service life of cable assemblies and mounted receptacles

Sav-Con<sup>®</sup> connector savers protect connectors that are mated and unmated frequently during manufacturing, test, check-out phases, and environmental test programs. They prevent costly repair or replacement by absorbing connect and disconnect abuse. Glenair Sav-Con<sup>®</sup> connector savers are available for both standard and high-density insert arrangements. Popular Sav-Con<sup>®</sup> part numbers, especially for N (normal) polarization are in-stock and ready for immediate, same-day shipment. Glenair also manufactures and supplies Sav-Con<sup>®</sup> connector savers and bulkhead feed-thrus for a complete range of MS circular and rectangular connectors.

- Traditional plug-receptacle savers, as well as in-line versions and gender changers
- Available EMI/EMP filter savers and adapters
- Pin/pin, pin/socket, and socket/socket versions
- Optional locking mechanism (recommended for bayonet-style connectors)

Series changers and gender changers available in both Sav-Con<sup>®</sup> and bulkhead feed-thru configurations

Each Glenair Sav-Con® Connector Saver meets the military specification performance requirements of its mating connector. Glenair manufactures and supplies a Sav-Con® connector saver for most every military standard connector currently in use including:

- MIL-DTL-26482 Series I and II
- MIL-DTL-28840
- MIL-DTL-38999 Series I, II and III
- MIL-DTL-83723 LN 29729 (SJT)
- PATT 105 and PATT 602
- Series 801 and 805 Mighty Mouse
- M24308 D-Subminiature
- MIL-DTL-83513 Micro-D Subminiature
- MIL-DTL-5015
- Series 28 HiPer-D® M24308 intermateable
- Series 89 Nano Miniature™ M32139
- Series 79 Micro-Crimp®

Comprehensive materials, plating, and polarization options available

### Circular Mil-Spec Compliance

#### Mil-Spec Compliance

Each Glenair Sav-Con<sup>®</sup> Connector Saver series meets the same durability requirements as the Military Specification series with which it mates. The mating portions of the pin-and-socket contacts are in strict compliance with the applicable Military Specification contacts used in each connector series.

#### Circuit Probing

The closed-entry socket contact design permits probing for individual circuits during equipment test and check-out, preventing possible damage to the equipment connectors.

#### Standard Material and Finishes

- Shell, Barrel and Coupling Nut – 300-series stainless steel, titanium, aluminum
- Front and Rear Insulators – Glass reinforced thermoset plastic
- PC Receptacle Potting – High-performance potting material
- Finish – See material and finish table
- Contacts – PC tails, socket and pin crimp contacts – Copper alloy, gold plated
- Contact Retention Clip – Beryllium copper, heat-treated, unplated
- Retaining Ring – Ryton
- Wave Spring – CRES

# Sav-Con® connector savers

## Circular military standard connectors

### Performance selection guide

## Sav-Con® Product Applications

Glenair Sav-Con® Connector Savers are designed to protect connectors that are subject to repeated mating and unmating cycles. Sav-Con® Connector Savers prevent costly repair or replacement of expensive connectors and cables while preserving the quality and integrity of connector performance. Sav-Con® Connector Savers take the abuse of repeated connection cycles instead of “black box” or other equipment connectors. Equipment connectors that are mated and unmated frequently during manufacturing, check-out phases and environmental test programs can be protected by Glenair Sav-Con® Connector Savers at considerable savings in time and money.

When a Sav-Con® Connector Saver is installed between a receptacle and a plug, the effective additional length is less than the length of an equivalent mated plug and receptacle. When using bayonet coupled Sav-Con® Connector Savers, Glenair recommends our Lock Ring design feature in applications where large cable bundles may induce unwanted stress to the coupling mechanism and potential unwanted contact displacement.

## Choosing the right Sav-Con® Connector Saver for your application

All classes of Glenair Sav-Con® Connector Savers feature one-piece, non-removable pin/socket contacts for maximum reliability and minimum effect on circuit resistance. The mating portions of the pin-and-socket contacts are in strict compliance with the applicable Military Specification contacts used in each connector series. The one-piece design adds resistance to a circuit equal to a mated pin and socket contact, thus it has minimum or no effect on sensitive circuits.

All bayonet coupled Sav-Con® Connector Savers are available with an optional locking feature on the coupling nut. This feature eliminates the wave spring inside the coupling nut, thus providing positive metal-to-metal bottoming out of the plug side of the Sav-Con® Connector Saver to the mating receptacle. Improved durability can be provided by specifying the optional dry lubricant on the inside surfaces of the coupling nut.

**Note:** Dry lubricant is not recommended for space applications due to outgassing requirements.

Glenair Sav-Con® Connector Savers are available in one or more of the following service classes (see specific series page for details):

| Class 0 - General Duty   | Class 1 - Environmental   | Class 2 - Hi-Rel  |
|--|---|---|
| Glenair's basic Sav-Con® design is suitable for use in benign environments, such as manufacturing and bench test areas. Not recommended for use in environmental test programs, or in installations which will be exposed to non-ambient conditions. | This category offers peripheral and interfacial sealing to comply with mating connector environmental requirements. | High-performance versions of Class 1 configurations. This design employs materials to provide an extremely broad operating temperature range. Additional outgassing is also available via a modification code for use in space applications. Consult factory for appropriate modification code. |

# Sav-Con® connector savers

## Circular military standard connectors

### Bayonet lock ring features

## Optional Lock Ring prevents accidental disengagement of bayonet coupled connectors

### The Coupling Nut:

This feature eliminates the wave spring inside the coupling nut, thus providing positive metal-to-metal bottoming out of the plug side of the Sav-Con® Connector Saver to the mating receptacle. This is a desirable option in the following applications:

### Locking a Sav-Con® to a receptacle:

Locking a Sav-Con® Connector Saver to a receptacle can prevent accidental or unauthorized unmating. This can insure that the equipment receptacle remains in its unused condition prior to delivery.

### Locking a Sav-Con® to reduce lateral forces:

Lateral forces caused by a heavy cable can be reduced when the Sav-Con® Connector Saver is locked to the equipment receptacle. On high-density connectors that have a limited pin-and-socket engagement length, the force applied by a heavy cable can collapse the wave spring and create unwanted discontinuities in the mated contacts.

### Locking a Sav-Con® when delivered to end-user:

When equipment is delivered to the end-user, the Sav-Con® Connector Saver may be locked to its mating receptacle to insure that the receptacles mounted on the equipment will remain unused until final installation of the equipment.

### Locking a Sav-Con® to a cable mounted plug:

It is often desirable to lock a Sav-Con® Connector Saver on a cable-mounted plug coupler to prevent accidental disconnect of the Sav-Con®.

Locking a Sav-Con® Connector Saver to a receptacle can prevent accidental or unauthorized unmating. This can insure that the equipment receptacle remains in its unused condition prior to delivery.

1. To engage the plug portion of the saver, first ensure that the Lock Ring (2) is in the fully open position by turning the Lock Ring by hand clockwise until it stops.
2. Couple (1) to the Mating receptacle. Note: Pins should be visible in the three holes of the Coupling Ring (1).
3. To lock the Sav-con®, turn the Lock Ring (2) counter-clockwise by hand until it stops. This will seat the bayonet pins.
4. Dis-Engagement is the reverse of steps 3 and 2. Turn Lock Ring (2) to the open position clockwise by hand until it stops. Then rotate the Coupling Ring (1) counter-clockwise until all contacts are separated.

### CATALOG NOTES

For all circular Sav-Con® connectors in this catalog:

- All parts will be identified with manufacturer's name and part number, space permitting.
- Glenair 600 series backshell assembly tools are recommended for assembly and installation.
- Dimensions are subject to change without notice. Metric dimensions appear in parentheses in diagrams and tables, based on 1 inch = 25.4 mm, for reference only. Unless otherwise specified, the following other dimensional tolerances apply:  
.xx = ± .03 (0.8)      Lengths = ± .060 (1.52)  
.xxx = ± .015 (0.4)      Angles = ± 5°

Customers are advised to consult the factory for the latest specifications, particularly to confirm critical dimensions such as connector lengths, threads, and so on. When errors or mistakes are brought to our attention, corrected content is posted immediately to [www.glenair.com](http://www.glenair.com).

### Series 89 Nano-Miniature<sup>™</sup> Specifications

A

| Sav-Con <sup>®</sup> Nano-Miniature <sup>™</sup> Plating Codes: ROHS Compliance |   |   |  |
|---|---|---|--|
| Nano Plating Code   | Plating Type  | RoHS Compliance   | Notes  |
| A1  | Cadmium with yellow chromate conversion coating over electroless nickel | No  | Electroless nickel is the preferred alternate.   |
| A2  | Electroless nickel  |  | First choice for RoHS compliance. Good corrosion resistance, excellent conductivity, M32139 approved, always in stock. |
| S   | Stainless steel shell, passivated                                       |  | Higher cost but unsurpassed corrosion resistance, not conductive enough for typical EMI needs. Build-to-order.         |
| T   | Titanium, unplated  |  | Higher cost but unsurpassed corrosion resistance, not conductive enough for typical EMI needs. Build-to-order.         |

| Sav-Con <sup>®</sup> Series 89 Nano-Mianiture <sup>™</sup> Material Specification |  |
|---|--|
| Connector Shell   | Aluminum Alloy, Electroless Nickel Plated Per SAE-AMS-C-26074, Class 3 or 4, Grade B |
| Socket Insulator  | Liquid Crystal Polymer (LCP), per MIL-M-24519 or ASTM D5138                          |
| Plug Insulator  | Liquid crystal polyer (LCP) per MIL-M-24519 or ASTM D5138                            |
| Potting material  | Dexterhysol epoxy  |
| Plug contact  | Gold alloy per AST B477 and ASTM B541  |
| Socket Contact  | Gold alloy, unplated, per ASTM B477 or ASTM B541.                                    |
| Wire  | 30 AWG gold plated copper alloy  |
| Hardware  | 300 Series Stainless Steel   |
| Encapsulant   | Epoxy  |

| Sav-Con <sup>®</sup> Series 89 Nano-Mianiture <sup>™</sup> Performance Summary |  |
|--|--|
| Contact Spacing  | .025" (0.64) Contact Centers   |
| Wire Accommodation   | #30-#32 AWG  |
| Current Rating   | 1 AMP Maximum  |
| Voltage Rating (DWV)   | 250 VAC RMS Sea Level, 100 VAC RMS 70,000 Feet                                 |
| Insulation Resistance  | 5000 Megohms Minimum   |
| Operating Temperature  | -55° C. to +125° C.  |
| Optional High Operating Temperature  | Mod Code 428 rated up to 400° C.   |
| Contact Resistance   | 71 Millivolt Drop Maximum, 1 AMP Current, #30 AWG Wire                         |
| Vibration  | 20 g's, in Accordance with EIA-364-28, Condition IV                            |
| Shock  | 100 g's, in Accordance with EIA-364-27, Condition G                            |
| Durability   | 200 Mating Cycles  |
| Corrosion Resistance   | 48 Hours Salt Spray In Accordance With EIA-364-26, Condition B                 |
| Humidity   | 96 Hours, In Accordance with EIA-364-31 Condition A                            |
| Contact Engaging/Separation Force  | 5 Ounce Maximum, 0.4 Ounce Minimum   |
| Thermal Vacuum Outgassing  | Total Mass Loss (TML) 1.0% Max., Volatile Condensable Material (VCM) 0.1% Max. |

\* Salt spray test in accordance with ASTM B117

**Sav-Con<sup>®</sup> Series 79 Micro-Crimp<sup>®</sup> Material Specification**

|                                    |  |
|------------------------------------|--|
| Size #23 contacts                  | Beryllium copper alloy, plated gold over nickel        |
| Size #16 and #12 contacts          | Copper alloy   |
| Insulators                         | Liquid crystal polymer, 30% glass-reinforced           |
| Shell                              | Aluminum alloy. See ordering info for finish options   |
| Interfacial seal and grommet       | Fluorosilicone   |
| Contact and insert retention clips | Beryllium copper, heat-treated, unplated               |
| Jackposts and guide pins           | Stainless steel, passivated                            |
| Spring, EMI (plug)                 | Stainless steel or beryllium copper alloy, gold plated |

**Sav-Con<sup>®</sup> Series 79 Micro-Crimp<sup>®</sup> Performance Summary**

|                          |  |
|--------------------------|--|
| Current rating           | Contact size #23 5 Amps, size #16 13 Amps, size #12 23 Amps maximum                  |
| Voltage rating (DWV)     | Contact size #23 500 VAC rms. Size #16 and #12 1800 VAC rms. Sea level.              |
| Insulation resistance    | 5000 megohms minimum   |
| Operating temperature    | -65° C. to +150° C.  |
| Contact resistance       | 5 milliohms maximum  |
| Water ingress protection | IP67 (Mated condition)   |
| Shielding effectiveness  | >75 dB attenuation from 100 MHz to 1000MHz, >60dB 1GHz to 4GHz, >40dB 4GHz to 10GHz. |

CIRCULAR  
CONNECTORS

# SAV-CON<sup>®</sup>

## *Circular Connector Savers*

High reliability connector savers for mission-critical applications

**G**lenair Sav-Con<sup>®</sup> Connector Savers are designed to protect the quality and integrity of connectors that are mated and unmated frequently during manufacturing, test, check-out phases or environmental test programs. Available in general duty, environmental, and high-reliability performance classes with keyed polarization and optional locking mechanisms for bayonet style connectors, Glenair offers Sav-Con<sup>®</sup> Connector Savers for most all MS cylindrical connector series—many in-stock and available for immediate, same-day shipment.

### Selection Guide

#### STANDARD OR FILTERED SAV-CON® CONNECTORS FOR MILITARY AND COMMERCIAL CYLINDRICAL CONNECTORS

Glenair standard and filtered Sav-Con® Connector Savers are available in a wide range of military standard configurations including MIL-DTL-26482 Series I and II; MIL-DTL-28840; MIL-DTL-38999 Series I, II and III; MIL-DTL-83723 Series I and III, threaded and bayonet connector savers; LN 29729 (SJT); PATT 105-PATT 602; and MIL-DTL-5015. Each Glenair Sav-Con® connector saver meets the same durability requirements as the military specification series with which it mates.

\* Please consult the factory for Pin/Pin and/or Socket/Socket contact arrangements.

#### NOTES

1. Other filter styles (C-L, L-C, Unbalanced Pi, Multi-Stage, Multi-Value) are available, please consult the factory.
2. Please consult the factory for Pin/Pin and/or Socket/Socket contact arrangements.
3. Do not mate Universal key position with another Universal.

| Filter Connector                | 240-382   |   |    |       |    |   |   |   |   |
| Shell Style                     | A = Connector Adapter                                     |   |    |       |    |   |   |   |   |
| Connector Class                 | See Table I   |   |    |       |    |   |   |   |   |
| Shell Size - Insert Arrangement | See Table II  |   |    |       |    |   |   |   |   |
| Contact Gender                  | PS = Pins, Plug Side SP = Sockets, Plug Side (See Note 2) |   |    |       |    |   |   |   |   |
| Filter Type                     | P = Pi Circuit C = C Circuit (See Note 1)                 |   |    |       |    |   |   |   |   |
| Capacitance                     | See Table IV  |   |    |       |    |   |   |   |   |
| Flange Mounting Style           | N = Not Applicable  |   |    |       |    |   |   |   |   |
| Alternate Key Position          | A, B, C, D, N = Normal, U = Universal; See Note 3         |   |    |       |    |   |   |   |   |

#### NOTES

1. Other filter styles (C-L, L-C, Unbalanced Pi, Multi-Stage, Multi-Value) are available, please consult the factory.
2. Please consult the factory for Pin/ Pin and/or Socket/Socket contact arrangements.
3. Do not mate Universal key position with another Universal

| Dimensions |              |              |
|------------|--------------|--------------|
| Shell Size | Ø A Max      | Ø B Max      |
| 8          | .474 (12.0)  | .784 (19.9)  |
| 10         | .591 (15.0)  | .894 (22.7)  |
| 12         | .751 (19.1)  | 1.031 (26.2) |

#### NOTES

- Glenair's 233-213 connector savers are designed to meet or exceed the mechanical dimensional, electrical, and environmental requirements of MIL-DTL-38999, D38999/20, D38999/26, and MIL-STD-1560 except as shown and/or noted.
- Glenair connector savers mate with any QPL manufacturer's MIL-DTL-38999, series III plugs and receptacles that have the same shell size, insert arrangement, and polarization.
- For pin/pin and socket/socket, symmetrical insert layouts only.
- Power to a given contact on one end will result in power to a contact directly opposite, regardless of identification letter.
- Electrical safety limits must be established by user. Peak voltage, switching surge, transient, etc. should be used to determine the safety application.
- Alternate polarization 'U' (universal) is a non-standard/non-mill-spec option intended for test lab use only which allows for mating to any QPL manufacturer's MIL-DTL-38999, series III connector having the same shell size, insert arrangement, and mating contact size.

#### Design Features:

- Incorporates all MIL-STD-D38999 Series III Design Features
- Intermateable with D38999/20, /24 and /31 Connectors
- Insert Arrangement 25-20 Compatible with MIL-STD-1553 Aircraft Multiplex Data Bus

#### NOTES

1. Other filter styles (C-L, L-C, Unbalanced Pi, Multi-Stage, Multi-Value) are available, please consult the factory.
2. Please consult the factory for Pin/Pin and/or Socket/Socket contact arrangements.

## MIL-DTL-26482 Series I and II

### Reference Information

**Table I: Material and Finish**

| Plating Code | Material        | Finish  |
|--------------|-----------------|---|
| M            | Aluminum        | Electroless Nickel                                    |
| B            |                 | Cad Plate, Olive Drab                                 |
| NF           |                 | Cadmium Plate Olive Drab over Electroless Nickel      |
| NC           |                 | Zinc-Cobalt   |
| ZN           |                 | Olive Drab Zinc-Nickel                                |
| MT           |                 | Ni-PTFE 1000 Hour Grey™ (Nickel Fluorocarbon Polymer) |
| ZR           |                 | Zinc Nickel, Black                                    |
| ME           |                 | Electroless Nickel (RoHS)                             |
| ZL           | Stainless Steel | Electro-Deposited Nickel                              |

**FACE VIEW RECEPTACLE**

To avoid cross-plugging problems in applications requiring the use of more than one connector of the same size and arrangement, alternate positions are available.

In alternate positions, the pin insert rotates clockwise the same number of degrees relative to the center line of the master key or keyway. The socket insert would be rotated counter-clockwise the same number of degrees in respect to the normal shell key.

**Table IV: Capacitor Array Code Capacitance Range for Filtered connectors**

| Class | Pi - Circuit (pF) | C - Circuit (pF) |
|-------|-------------------|------------------|
| X*    | 160,000 - 240,000 | 80,000 - 120,000 |
| Y*    | 80,000 - 120,000  | 40,000 - 60,000  |
| Z*    | 60,000 - 90,000   | 30,000 - 45,000  |
| A     | 38,000 - 56,000   | 19,000 - 28,000  |
| B     | 32,000 - 45,000   | 16,000 - 22,500  |
| C     | 18,000 - 33,000   | 9,000 - 16,500   |
| D     | 8,000 - 12,000    | 4,000 - 6,000    |
| E     | 3,300 - 5,000     | 1,650 - 2,500    |
| F     | 800 - 1,300       | 400 - 650        |
| G     | 400 - 600         | 200 - 300        |
| J     | 70-120            | 35-60            |

\* Filter Classes X, Y and Z are 250 VDC.  
All others are 500 VDC

**Table II: Insert Arrangement and Alternate Positioning**

| Shell Size Desig. | Insert Arrangement Dash No | Contact Size: Quantity |    |    | Alternate Insert Positions |     |     |     |
|-------------------|----------------------------|------------------------|----|----|----------------------------|-----|-----|-----|
|                   |                            | 20                     | 16 | 12 | A Degrees                  |     |     |     |

#### NOTES

- Other filter styles (Pi, C-L, L-C, Unbalanced Pi, Multi-Stage, Multi-Value) are available, please consult the factory.
- Please consult the factory for Pin/ Pin and/or Socket/Socket contact arrangements.

**FACE VIEW RECEPTACLE**  
 In alternate positions, the pin insert rotates clockwise while the socket insert rotates counterclockwise the same number of degrees relative to the center line of the master key or keyway.

#### NOTES:

- In Alternate Insert Positions, the Pin Insert rotates clockwise while the Socket Insert rotates counter-clockwise the same number of degrees relative to the centerline of the Master Key or Keyway.
- In Alternate Key/Keyway Positions, the smaller Plug Keys rotate clockwise with respect to the centerline of the Master Keyway as shown.

| Shell Size | A-A° |    |     |     |     | B-B° |     |     |     |     | C-C° |     |     |     |     | D-D° |     |     |     |     | E-E° |    |    |    |    |

| <b>Finish</b>                 | See Table I  |
| <b>Insert Arrangement</b>     | See Table II   |
| <b>Contact Gender</b>         | PS = Pins, Plug Side SP = Sockets, Plug Side (See Note 2)    |
| <b>Filter Type</b>            | P = Pi Circuit C = C Circuit; See Table IV, See Note 1       |
| <b>Capacitance</b>            | See Table IV   |
| <b>Alternate Key Position</b> | A, B, C, D, E, F, U A = Normal, U = Universal; See Table III |

B

#### NOTES

1. Other filter styles (C-L, L-C, Unbalanced Pi, Multi-Stage, Multi-Value) are available, please consult the factory.
2. Please consult factory for Pin/Pin and/or Socket/Socket contact arrangements.

B

#### NOTES

- Other filter styles (C-L, L-C, Unbalanced Pi, Multi-Stage, Multi-Value) are available, please consult the factory.
- Please consult factory for Pin/Pin and/or Socket/Socket contact arrangements.

#### NOTES

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Glenair 940-014 connector saver is designed to mate with Glenair 220-06 series Geo-Marine<sup>®</sup> connectors. (Non-scoop-proof)

#### MATERIAL/FINISH:

- Barrel, shell, coupling nuts - see Table II.
- Contacts - copper alloy/gold plate.
- Insulators - high grade rigid dielectric/N.A.
- O-ring & seals - silicone/N.A.

#### NOTES:

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Glenair 940-025 connector saver is designed to mate with Glenair 220-16 series Geo-Marine® connectors. (Scoop-Proof)

#### MATERIAL/FINISH:

- Barrel, shell, coupling nuts - see Table II.
- Contacts - copper alloy/gold plate.
- Insulators - high grade rigid dielectric/n.a.
- O-ring & seals - silicone/n.a.

B

*BETTER THAN QPL*

## SuperNine®: The advanced-performance MIL-DTL-38999 Series III style connector

Better than QPL? SuperNine® is the interconnect industry's most complete and advanced D38999 Series III type connector family. From IP-68 rated environmental-class connectors with improved durability and ease-of-use, to EMI/EMP filter connectors with innovative flange and PC tail termination configurations, SuperNine® offers military and commercial aerospace customers that have standardized on Series III technology the opportunity to improve interconnect system performance and resolve a wide range of persistent electrical, environmental, and mechanical performance problems—all with catalog (COTS) connector solutions backed by Glenair's high-availability business model.

Better than QPL means significant innovation in every class of connector in the series. SuperNine® hermetics for example, offer many features not available in QPL hermetic solutions, such as crimp-removable socket contacts. Our fiber optic connector series is designed and built to tight-tolerances to ensure precise alignment of fiber optic termini, and superior optical performance.

SuperNine® offers improved durability, sealing, cost-of-ownership, ease of shield termination, a broader range of PC tail configurations, environmental and hermetic bulkhead feed-throughs, connector savers, off-the-shelf EMI/EMP filter connectors and more—all supported with Glenair's well-established reputation for service, support, and fast turnaround.

Glenair SuperNine® connectors in action: in this example, a pair of our advanced fiber optic interconnects cabled-up in a turnkey, environmentally sealed point-to-point jumper

---

### THE SUPERNINE® TECHNOLOGY PROMISE

- **Across-the-board improvements in mating-cycle and contact durability**
- **Advanced ease-of-use features such as integrated band porches and PC-Tail standoffs**
- **Advanced-performance improvements in every connector class—from filters to fiber optics**

## Rectangular Connector Savers

Connector savers for D-subminiatures, HiPer-D™  
Micro-D, Nano-Miniature™ and Micro-Crimp™

**G**lenair Sav-Con® Connector Savers—the smart way to prevent contact damage and protect connectors for mating and unmating wear. Now available for all of our rectangular connector lines:

- Series 28 HiPer-D® the M24308 compatible D-subminiature for standard and high density applications
- Micro-D and Nano-Miniature™ connectors with high performance TwistPin contacts
- And Series 79 Micro-Crimp™ our high density, low profile aerospace connector.

# Sav-Con<sup>®</sup> connector savers

## HiPer-D<sup>®</sup> Series 28 D-Subminiature

### 289-012 Standard and High Density

## Sav-Con<sup>®</sup> D-Subminiature Connector Saver

Low profile one-piece machined aluminum housing and ground spring protects circuits from EMI problems. Available in standard density and high density contact arrangements. Pin mating face has fluorosilicone rubber seal. Choose electroless nickel shell finish for avionics and space applications. Choose cadmium for compatibility with cadmium or zinc plated M24308 connectors, or choose nickel-PTFE for maximum corrosion protection. Other materials and finishes available on request.

# Sav-Con® connector savers

## Micro-D connector saver

### MWDM2L with TwistPin Contacts

## Protect Expensive Equipment with Glenair Micro-D Savers

These connector savers feature a one-piece aluminum housing, TwistPin contacts and locking hardware. Typical applications include test equipment and space-grade instruments. The Micro-D Sav-Con® prevents wear and tear on sensitive gear. Standard versions are electroless nickel plated. Other plating finishes are available on request.

- Compact Size reduces stress on mating connectors.
- In Stock, No Waiting – All standard sizes are in stock (9, 15, 21, 25, 31, 37, 51 and 100 pin).
- EMI Protected one piece shell.

# Sav-Con<sup>®</sup> connector savers

## Micro-D filtered connector saver

### 240-033 In-Line Filter Adapter

## EMI/RFI Filter Micro-D Connector Saver

Glenair Sav-Con<sup>®</sup>, inline filter adapter, provides EMI solutions in a miniaturized M83513 type connector. These connectors feature ceramic capacitor planar arrays and ferrite inductors. Solder cups accept #26 thru #30 AWG wire, or specify oversize contacts for #24 gage wire.

Choose PI or C Filter arrays in eighty filter classes and six layouts. Glenair filtered Micro-D connectors comply with applicable MIL-DTL\_83513 requirements and are 100% intermateable with standard connectors.

Choose 9 to 37 contacts, with standard cadmium or nickel plating on the connector housing or choose optional finishes such as gold or Chem Film.

# Sav-Con<sup>®</sup> connector savers

## Series 79 Micro-Crimp<sup>®</sup> connector saver

### 799-070

**Glenair Series 79 Connector Savers** provide a low profile one-piece machined aluminum housing. Ground spring protects circuits from EMI problems. Pin mating face has fluorosilicone rubber seal. Choose electroless nickel shell finish for avionics and space applications. Also available with cadmium for compatibility with cadmium or zinc plated connectors, or choose nickel-PTFE for maximum corrosion protection. Other materials and finishes available on request.

#### MATERIAL/FINISH:

- Shell assembly—Al alloy/see 38999 Reference Information section Table I
- Bayonet pins—CRES/passivate
- Contacts—copper alloy/gold plate
- Insulators—high-grade rigid dielectric/N.A.
- Interfacial & peripheral seals—silicone/ N.A.

# Sav-Con® connector savers

## MIL-DTL-38999 Series III

### Reference Information

| Plating Code | Material | Finish  |
|--------------|----------|---|
| M            | Aluminum | Electroless Nickel                                    |
| B            |          | Cad Plate, Olive Drab                                 |
| NF           |          | Cadmium Plate Olive Drab over Electroless Nickel      |

### NOTES

- Glenair 233-214 connector savers are designed to meet or exceed the mechanical dimensional, electrical, and environments, requirements of MIL-DTL-38999, D38999/20 and /24 and MIL-STD-1560 except as shown and /or noted. Glenair connector savers mate with any QPL manufacturer's MIL-DTL-38999, series III plugs and receptacles have the same shell size, insert arrangement, and polarization.
- For pin/pin and socket/socket, symmetrical layout only.
- Power to a given contact on one end will result in power to a contact directly opposite, regardless of identification letter.
- Electrical safety limits must be established by user. Peak voltage, switching surge, transient, etc. should be used to determine the safety application.
- Alternate polarization 'U' (universal) is a non-standard/non-mill-spec option intended for test lab use only which allows for mating to any QPL manufacturer's MIL-DTL-38999, series III connector having the same shell size, insert arrangement, and mating contact size. Universal connectors are intended for use in testing facilities only and should be highly evaluated before consideration in another environment.

#### NOTES

1. Assembly features straight-thru double-ended contacts, power to a given contact on one end will result in power to contact directly opposite, regardless of identification.
2. Symmetrical layout only, consult factory for available insert arrangements.

#### MATERIAL/FINISH:

- Barrel, adapter, junction nuts, coupling nuts—Al alloy/see 38999 Reference Information section Table I
- Insulators—high grade rigid dielectric/N.A.
- Contacts—copper alloy/gold plate

| 24         | 1.625-.1P-.1L | 1.906 |

**NOTES:**

1. Assembly identified with manufacturer's name and P/N, space permitting.
2. Glenair 227-152 connector receptacle is designed to mate with Glenair 220-16 series Geo-Marine<sup>®</sup> connectors. (scoop-proof)

**MATERIAL/FINISH:**

- Shell, lock nut - CRES/passivate.
- Contacts - copper alloy/gold plate.
- Insulators - high grade rigid dielectric/n.a.
- Interface seal - fluorosilicone/n.a.
- O-rings - nitrile/n.a.

## HiPer-D® D-subminiature

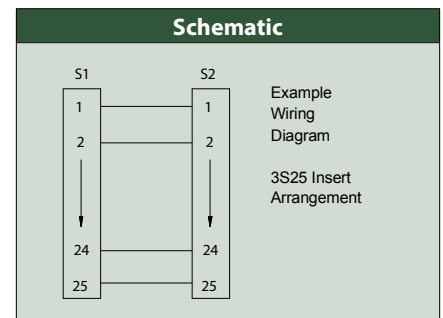

### 289-057P, 289-058S Gender Changer

HiPer-D® Gender Changers provide a convenient way to change the gender of an interface to allow attachment of a mismatched cable. Two styles are available: male-male and female-female. Machined metal housing protects circuits from EMI problems. Available in standard density and high density contact arrangements. Intermateable with standard M24308-type connectors. Pin mating face has fluorosilicone rubber seal. Choose electroless nickel or gold shell finish for avionics and space applications. Choose cadmium for compatibility with cadmium or zinc plated M24308 connectors, or choose nickel-PTFE for maximum corrosion protection. Other materials and finishes available on request.
